

# Work Better with AI™

Work Better with AI™ is a hands-on AI workshop designed to help organizations jumpstart their workforce's AI capability. In just two hours, this application-focused workshop helps teams boost productivity by strategically collaborating with and applying AI tools in their daily work.

## Turn AI curiosity into capability

Drive productivity and business value with generative AI

### INCORPORATE AI WITH A HUMAN TOUCH

Work Better with AI™ helps organizations introduce generative AI to their teams, building the confidence and skills needed to use AI tools and accelerate generating real business value every day.

Participants bring their own work challenges and make meaningful progress by applying human-centered prompt principles, strengthening power skills like collaboration, experimentation and adaptability.

### PITFALLS OF TRADITIONAL AI APPROACHES

- ✗ Lacks business application
- ✗ Fails to bridge theory and practice
- ✗ Limited strategic impact
- ✗ Tool-centric
- ✗ Overly complex & filled with jargon

### OUTCOMES

- **Accelerate accessing value** by auditing workflows with an application framework
- **Evaluate & refine AI outputs** by iterating and applying prompt principles for better results
- **Advance real business challenges** by problem-solving hands-on with AI skills
- **Adopt AI responsibly** by learning strategies to mitigate risks and maintain a human-centered approach to automation

### AT A GLANCE

-  In-person or virtual format
-  90 - 120 minutes time commitment
-  20+ participants
-  Our facilitator

### SUCCESS STORIES

Designed for professionals of all levels (no experience required), this workshop is ideal for training programs and conference-style events. Visit [experiencepoint.com/customers](https://experiencepoint.com/customers) or scan the QR code for more examples.

MORE STORIES

“I had poked around with Gen AI tools before, but after this workshop, I use it every day. It’s not my foe anymore; it’s my friend.”

- John Prentice, Co-Founder and Director of Change Enablement
